

Immunization Program

The Immunization Program provides immunizations to children and adults for vaccine preventable diseases (including foreign travel immunizations) through walk-in clinics and office appointments.

Tuberculosis

Testing for TB is conducted weekly on Mondays only from 9:00 to 11:00 AM on a walk-in basis. TB test results are read on Wednesdays ONLY from 9:00 to 11:00 AM. The charge for TB tests is \$20.00.

Flu Clinics

Flu clinics are held each fall.

International Immunizations

International Immunizations are sometimes required or recommended for some foreign countries. Vaccinations may be mandated by certain countries, and entry can be denied, if you have not had the required shots. Requirements can vary depending on the order in which you plan to visit various countries. Yellow fever is the most commonly required vaccination. Certain vaccines are also recommended based on diseases that are common in destination countries, but are not required for entry. All vaccines take time to become effective, so you should ideally allow 6-8 weeks between the time you receive the vaccine and the time you travel. International/foreign travel immunizations are done by APPOINTMENT ONLY. Please call the immunization clinic at 992-4547 to schedule an appointment. Please leave a detailed message that includes your full name, date of birth and a phone number where you can be reached.

Information regarding the side effects of vaccines and interpretation of TB testing are given at the time vaccines/tests are administered. Please use the Center for disease Control website/link at www.CDC.Gov for information on all types of immunizations.

**BANGOR IMMUNIZATION CLINIC
PRICE LIST
EFFECTIVE March 21, 2007**
